

CORPORATE & GOVERNMENT DISBURSEMENTS WITH ZELLE®

The payments landscape is quickly evolving, and consumers are increasingly demanding immediate access to funds across all money movement channels. Whether depositing a check with a mobile phone, receiving a person-to-person payment, or receiving a disbursement from a corporate or government entity, the expectation of faster payments is consistent.

In a 2015 study, Aite Group calculated that the U.S. economy could save an average of \$3.3 billion in business-to-consumer (B2C) check issuance costs by converting to electronic disbursements.¹ 53 percent of U.S. consumers received disbursements via check, presenting an opportunity to shift these disbursements to digital.

Digital payments are more secure than cash or checks, less expensive than issuing checks, easier to manage than cash, and convenient for the end-consumer.

Żelle

Introducing Disbursements with Zelle

ENABLE FAST, SAFE AND EASY PAYMENTS

Disbursements with Zelle enables token based (email or mobile number) disbursement capabilities to corporate clients. Combining fraud management capabilities with faster funds availability, Early Warning's Zelle Network® is changing the face of digital disbursements.
