

Early Warning®

Determine Assets & Eligibility

To reduce improper payments and better serve U.S. citizens, government agencies and their contracted resellers need a more efficient means for deciding program benefit applications.

Determine Assets & Eligibility leverages the Early Warning® *National Shared Database*™ Resource to quickly and accurately identify a consumer's financial assets.

Visibility into more than 600 million checking accounts, savings accounts, CDs and IRAs

How it Works in Real-Time

Step 1

The agency submits an electronic request to Early Warning related to a government benefits inquiry.

Step 2

Early Warning accesses its vast database resource to match all accounts and balances related to the inquiry—and returns a secure, detailed response in real-time.

Step 3

The agency uses the **Determine Assets & Eligibility** response intelligence to enable a timely and reliable benefits eligibility determination.
